Now that's refreshing! Apply today.

As the Technologist 2, Non-potable Systems, you will provide water to new and existing customers and perform operation and maintenance work within the SSEWS water system, which includes 250 km of canals and 7 reservoirs. You will operate and maintain pump stations and boosters to supply industrial, commercial, and agricultural users. This position is headquartered in Saskatoon. The service area for the position is Hanley/Blackstrap. A truck will be provided for work in the district the position services. The regular schedule for this role is eight(8) days on and six(6) days off, 10 hour days.

Key Duties and Responsibilities:
As the Technologist 2, Non-potable Systems, you will undertakes operational duties associated with the SSEWS regional water supply district including installation of system works and equipment. You will performs flow and pressure control testing and maintenance on existing connections and undertake leak, pump and motor repair and maintenance. This position performs line locates for contractors and oversees contractors and/or trades people to perform operations and maintenance work.

You will conducts field inspections of canal and reservoir operations to monitor performance and identify maintenance requirements. You will also perform field and chemical testing and water sampling, compile and record data and generate applicable reports. Additionally, you will perform regularly scheduled applications of herbicide to control aquatic and non-aquatic weeds within the canal system.

This position performs relevant technical calculations and assists with operational and maintenance reports and technical documentation. You will maintain system inventory and assist with identifying issues and maintenance requirements. You will also perform monthly

meter readings, work with engineering staff on capital projects and responds to operational issues as requested and undertake follow-up as required. You will liaise with regulatory agencies to ensure compliance with permits and licenses and undertakes operational duties including operating light and heavy equipment and performing regular equipment maintenance. You will assists with training and provides direction to staff on safe and efficient operational and maintenance procedures and techniques.

To qualify, you will have a two-year technical diploma. A combination of relevant experience and education will be considered. Preference will be given to candidates with a strong mechanical aptitude and hands-on experience in trades or related fields, including pipefitting, mechanical repair, landscaping, carpentry, farming, or other related fields

Certification at the appropriate levels in Water Treatment, Water Distribution, Wastewater Collection and Wastewater Treatment is required to be obtained in accordance with the Operator Certification Board requirements or existing industry reciprocity agreements.

Where applicable, a valid Saskatchewan operator's license for the appropriate vehicle class of equipment within a district is required.

In addition to the above qualifications the job requires 2 years of experience in the following areas:

- Working knowledge of water distribution, water transmission, open channel flow and reservoir operational issues; knowledge of irrigation practices and principles; and regional district operational and maintenance procedures including pipeline, pump, control valve and canal repair.
- Knowledge of construction practices and procedures.
- Ability to establish and maintain effective working relationships with staff, outside agencies and the public; and develop and maintain a positive corporate climate.
- Strong maintenance skills and mechanical aptitude are considered assets in this role. The ability to troubleshoot equipment, identify issues and complete minor repairs would support success in the position.

Special Requirements: *The position requires the incumbent to undergo a Criminal Record Check and Drug and Alcohol test. You must be legally entitled to work in Canada. A valid Saskatchewan driver's license is required.*
